PROFILE

Informatics Engineering graduate from Telkom University (GPA 3.56), with over 1 year of hands-on experience as a Network Engineer at PLN Icon Plus Jakarta and experience as a Teaching Assistant for Computer Networks courses. Skilled in network configuration and troubleshooting, full-stack web development using the Laravel framework, and developing IoT-based monitoring systems integrated with real-time data visualization and management to support efficient system monitoring and decision making. Proficient in networking technologies, PHP Laravel, MySQL, JavaScript, Firebase, and ESP32-based IoT development, with experience in data processing, dashboard development, and system integration. Demonstrates strong leadership, collaboration, and communication skills through organizational involvement, teaching assistant responsibilities, and project-based experience, with a proactive mindset, strong initiative, and a passion for delivering reliable and impactful technology solutions.

WORK EXPERIENCE

Network Engineer [PLN ICON PLUS JAKARTA]	<i>JUN 2021 – JUL 2022</i>
- Managed and maintained enterprise network infrastructure utilizing MikroTik and Cisco networking devices to ensure high network availability and operational reliability. - Performed Fiber Optic troubleshooting and maintenance, identifying root causes of network disruptions and restoring services efficiently. - Executed ONU/ONT provisioning, activation, and configuration for customer deployments, ensuring successful service implementation. - Configured VLANs, IP addressing, routing, and switching to support secure and scalable network architecture. - Collaborated with cross-functional technical teams in network deployment, preventive maintenance, and incident resolution while adhering to operational standards. - Produced technical documentation and service reports to support network maintenance, troubleshooting, and operational monitoring.	

HARD SKILL

Network Engeineer (<i>intermediate-Advanced</i>)
- Network Installation, Maintenance & Troubleshooting. - ONU/ONT Activation & Configuration. - MikroTik Configuration, Cisco Router & Switch Configuration
Full-stack Web Development (<i>intermediate</i>)
- Laravel Framework (PHP, HTML, CSS, Bootstrap, JavaScript) - REST API Integration - Authentication & CRUD System Development
Database & Data Management (<i>intermediate</i>)
- MySQL, Firebase Database - Data Processing, Management and Visualization - Real-time Data Monitoring Dashboar
IoT Development (<i>intermediate</i>)
- ESP32 Programming & Sensor Integration (pH, TDS, DS18B20, DHT22) - Firebase Realtime Database - Real-time IoT Dashboard Monitoring System
Tools & Platforms
Visual Studio Code, Arduino IDE, Cisco Packet Tracer, Git & GitHub, REST API Integration

CERTIFICATION & BOOTCAMP

• BNSP Competency Certificate – Junior Cyber Security	<i>DEC 2025</i>
• CISCO CCNA Routing and Switching : Introduction to Network	<i>APR 2020</i>
• CISCO Cybersecurity Essentials	<i>MAR 2021</i>

ORGANIZATION EXPERIENCE

STAFF OF SOCIAL DEPARTEMENT [HIMPUNAN MAHASISWA TEKNIK INFORMATIKA (HMIF)] TELKOM UNIVERSITY	<i>DEC 2023 - DEC 2024</i>
Sponsorship & Partnership: Successfully negotiated sponsorship agreements with external partners, securing funding that covered 100% of the operational budget for the UPGRADE IF Series 2 event. Event Leadership: Served as Chief Organizer of UPGRADE IF Series 2, coordinating the organizing committee, managing event planning, and ensuring the successful execution of the program. Team Collaboration: Collaborated with internal committees and external stakeholders to coordinate event logistics, sponsorship deliverables, and program activities, ensuring smooth event operation	

EDUCATION

Telkom University - Bachelor’s Degree in [Informatics Engineering], GPA:3.56/4.00	<i>SEP 2022 – JUL 2026</i>
